

Josiah & The Bonneville's Announce Debut EP, *Cold Blood*, on Vagrant Records/BMG

New Song "Cold Blood" Premieres Today

North American Tour w/ William Elliot Whitmore Starts Next Week

Josiah is one of those souls so old that he's likely been here on this dirt two or three times already now...It's not possible to be so saddened, but not deadened, at a non-ripe old age."-(**Daytrotter**)

(April 20, 2016)- Tennessee's Josiah & The Bonneville's are pleased to announce the release of their debut EP, *Cold Blood*. Comprised of four tracks co-produced and mixed by **Dave Way** (Fiona Apple, Paul McCartney, Macy Gray). *Cold Blood* reaffirms the principles of Americana as a genre that can offer listeners sincere and universal insight through genuine story telling. Today, check out the title track that [Sodwee](#) loves, highlighting Josiah's "authenticity and top-notch songwriting," here: <http://smarturl.it/ColdBloodSC>

The EP, which is a portion of the band's upcoming full-length album, showcases songwriting that is refreshingly rooted in earnest and honest lyrics. Fans of Ryan Adams, Father John Misty and Conor Oberst will find familiar footing here, articulated by a young band and frontman wise beyond their years.

Cold Blood will be released everywhere this Friday via Vagrant Records/BMG. In celebration, Josiah & The Bonneville's will be hitting the road with **William**

Elliott Whitmore next week for a run of North American tour dates, followed by Canadian dates supporting **Northcote** in June. A full list can be found below.
